INSTITUT TEKNOLOGI DEL 2026

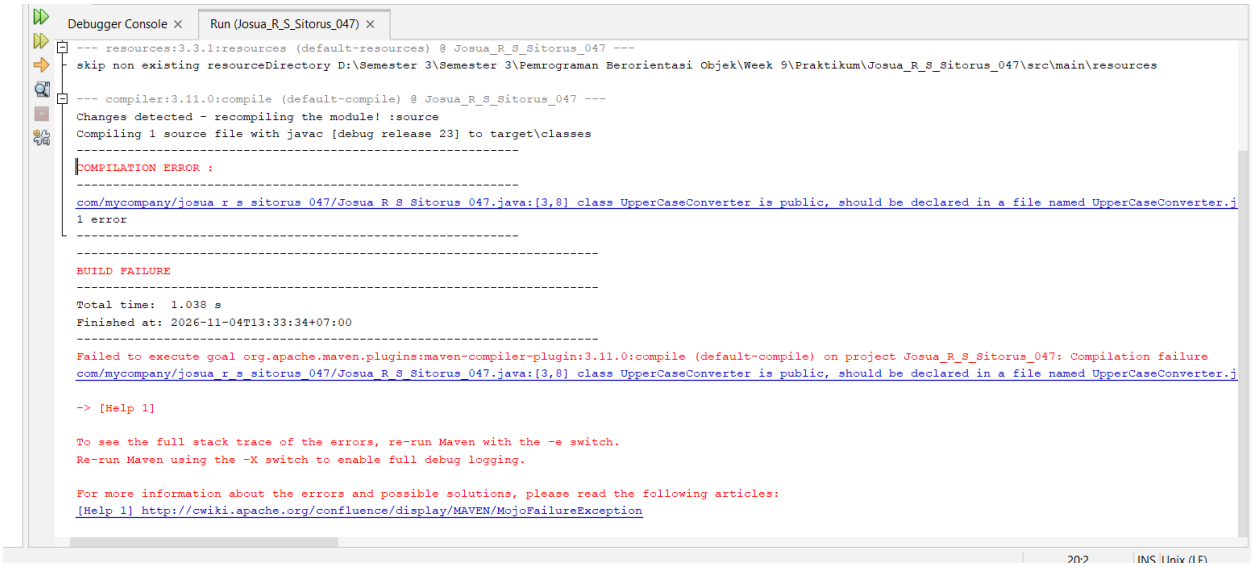

```java
import java.io.*;

public class UpperCaseConverter {
    public static void main(String[] args) {
        try (BufferedReader br = new BufferedReader(new FileReader("input.txt"));
             BufferedWriter bw = new BufferedWriter(new FileWriter("output.txt"))) {

            String line;
            while ((line = br.readLine()) != null) {
                bw.write(line.toUpperCase());
                bw.newLine();
            }

            System.out.println("Konversi selesai!");

        } catch (IOException e) {
            System.out.println("Terjadi error: " + e.getMessage());
        }
    }
}
```

```

class UpperCaseConverter is public,

should be declared in a file named UpperCaseConverter.java

Artinya:

- Nama file saya: Josua_R_S_Sitorus_047.java
- Nama class di kode: UpperCaseConverter

public class UpperCaseConverter { ku ganti public class Josua_R_S_Sitorus_047 {

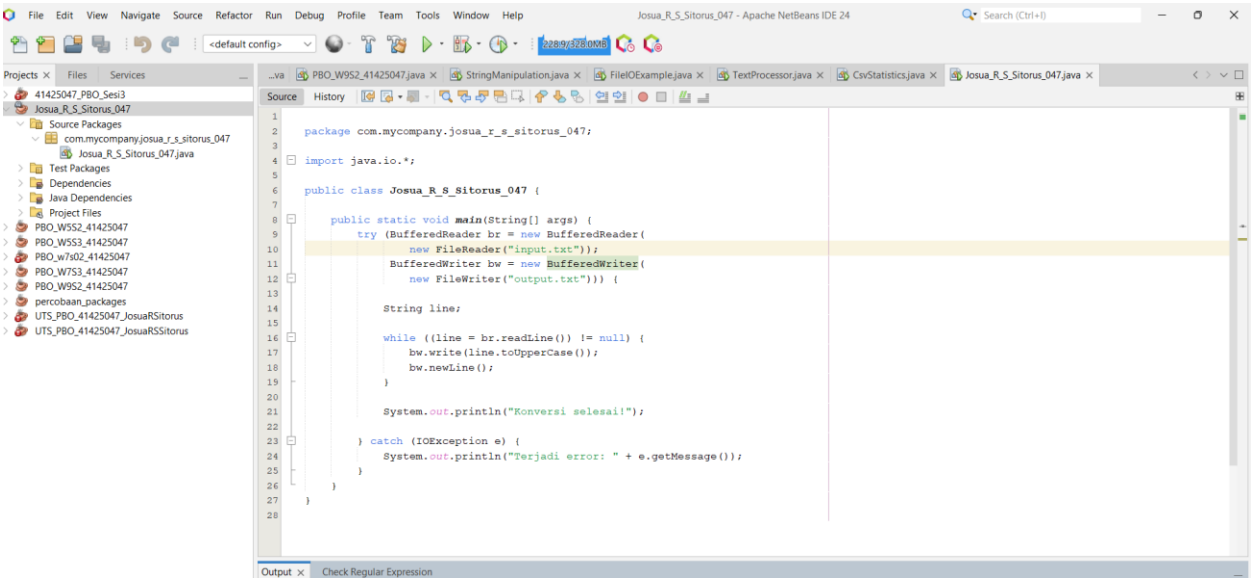

Refleksi Exercise String Manipulation dan Stream I/O

Setelah mengerjakan exercise UpperCaseConverter, saya semakin memahami cara menggunakan String Manipulation dan Stream I/O pada Java.

Sebelumnya, saya memahami toUpperCase() hanya sebagai metode untuk mengubah huruf kecil menjadi huruf besar. Setelah mengerjakan exercise ini, saya memahami bahwa metode tersebut juga dapat digunakan saat membaca isi file dan mengubah teks secara langsung sebelum menyimpannya kembali ke file lain.

Saya juga memahami fungsi BufferedReader untuk membaca file per baris dan BufferedWriter untuk menuliskan hasil ke file. Selain itu, penggunaan try-with-resources membantu menutup file secara otomatis setelah proses selesai.

Dari exercise ini, saya mendapatkan pemahaman bahwa pengolahan String tidak hanya dilakukan pada teks yang dimasukkan secara langsung, tetapi juga dapat diterapkan pada data yang dibaca dari file.

```
package com.mycompany.josua_r_s_sitorus_047;

import java.io.*;

public class Josua_R_S_Sitorus_047 {

    public static void main(String[] args) {
        try (BufferedReader br = new BufferedReader(
                new FileReader("input.txt"));
             BufferedWriter bw = new BufferedWriter(
                new FileWriter("output.txt"))) {

            String line;

            while ((line = br.readLine()) != null) {
                bw.write(line.toUpperCase());
                bw.newLine();
            }

            System.out.println("Konversi selesai!");

        } catch (IOException e) {
            System.out.println("Terjadi error: " + e.getMessage());
        }
    }
}
```
